

R markdown lab

Jeff Leek

July 3, 2015

1. Try compiling this document using the “Knit HTML” button.
2. Edit the output to be “pdf_document” and recompile
3. What does “chunk1” do here?

```
x = rnorm(100)
plot(x)
```

Make this a secondary header and recompile

5. Change fig.height to something larger/smaller and see what happens

```
x = rnorm(100)
plot(x)
```

6. Add a chunk option of `fig.align="center"` to center this plot

```
x = rnorm(100)
plot(x)
```

6. Add a chunk option of `echo=FALSE` and see what happens

```
x = rnorm(100)
plot(x)
```

7. Add the command `sessionInfo()` to this chunk and look at the output

```
sessionInfo()
```

```
